

SUMMER PACKING LIST BUNDLE

SUMMER PACKING LIST BUNDLE

Hey there Pretty!

I'm Alison, the mom of three and former engineer behind the blog, [Get Your Pretty On](#). A few years ago, I started working from home and that's when I fell into my yoga pants rut (FYI – none of my yoga pants had ever been to yoga!). In a desperate search for ways to make style easy I created my online styling program [Outfit Formulas](#). Since then I've taught over 100,000 members how to shop for and use my Outfit Formulas that work for EVERY body. It's like math for your closet (but the fun kind!).

I'm so excited that you're checking out my Summer Packing List Bundle. You can kiss paying that overweight luggage fee goodbye since you'll be a pro traveler in no time! Before we dig in let's cover the basics.

What is a packing list?

A packing list is a finite collection of clothes designed to create mix and match outfits and minimize over packing for vacation. Think of it like a mini capsule wardrobe for a very specific purpose. Using a packing list during travel ensures that you are making efficient use of your limited suitcase space and have enough outfits to wear while you are away.

How to use this guide?

Take a look at each packing list included in this guide (there are 6 in total!) and decide which one will work best for your travel needs. Things to consider include duration of your vacation, types of activities you'll be doing while away, and any special events that may require a specific style of outfit. Once you determine which packing list is best for you, start crossing items off the list. Shop your closet first for pieces that you already own that are the same or similar to items listed. For example, you may substitute a bright tank top for a bright t-shirt. Fill in any gaps by shopping at your favorite retailer online or in store. If there isn't one entire packing list that will work for all of your activities feel free to add in an outfit or two from another packing list. Just make sure to add those items to your checklist so you don't forget anything. Feel free to print off the outfit combination pages and pack them too so you'll know exactly how to pair up each look.

SUMMER PACKING LIST BUNDLE

A few quick tips...

Here are a few additional guidelines I like to follow when I create my own packing lists:

1. Only include pieces that can be paired up in at least 2-3 different ways.
2. Pack only one pair of each type of shoe. One flat shoe, one with heels, a sneaker, etc.
3. Bring as many accessories as you like. They don't take up much space and they go a long way toward changing up the look of your basics.
4. Take pics on your phone of all your outfit pairings before you go. It makes getting dressed every day that much easier!

Now pull your suitcase out of the closet and get packing!

xo,
